

OK International wins EM Asia Innovation Award and SMT China Vision Awards

OK International is currently celebrating a successful performance at this year's Nepcon China, having collected three prestigious awards at two of the trade show's awards events. The awards, presented by EM Asia (announced April 25th) and SMT China (announced April 24th), are evidence of the company's commitment to developing the Asian electronics market with product and process innovation.

Publication	Award Category	OK International System
EM Asia	Manual Soldering Equipment	Multi-Function Rework (MFR) System
SMT China	Assembly Tools	PS (Production Soldering) Platform
SMT China	Rework & Repair	APR-5000 Array Package Rework Platform

EM Asia

Established to recognise and celebrate excellence in the Asian electronics industry, the annual EM Asia Innovation Awards Program honors companies committed to driving the industry forward. This year, OK International led the Manual Soldering Equipment category with its acclaimed MFR Series, as the panel of judges recognized its ability to meet every soldering, rework and desoldering requirement from a single platform.

SMT China

The Vision Awards recognize the companies and products that serve as benchmarks of excellence within the surface mount industry. Judged by an independent panel of industry experts, the awards recognize excellence in the Asian electronics industry. This year, OK International was acknowledged in two categories: Assembly Tools and Rework & Repair.

The PS Platform was awarded in the Assembly Tools category and the APR-5000 Platform was recognized in the Rework & Repair category.

"We are excited to win these awards," said Tom Seratti, Global VP of Sales and Marketing.

"It is an honour to be included in the same class as the other winners, as well as to be recognized for our commitment to the China electronics industry."
