

**European Policy Statement**  
**Directive:2002/95/EC (RoHS)**  
**Directive:2002/97/EC (WEEE)**

As we approach the deadlines for these directives, we thought it would be useful for our customers and sales partners to clarify our position on the above directives.

**RoHS: Restriction of Hazardous Substances.**

Our part numbers will not change. To assist our sales channel to rotate stock, "RoHS Compliant" labels will appear on the outside packaging. RoHS compliance can also be verified by checking the serial or lot number. These will be listed on our Certificates of Compliance which will be available from our European offices. Certificates will be available in English, French, German and Italian.

All products in our UK warehouse and within our sales channel throughout the EEC on June 30<sup>th</sup>, 2006 will be classed as being already "on the market" and available for sale whether RoHS compliant or not. There will not be a deadline for these products to be sold.

Therefore non-RoHS compliant stock will not be accepted back as part of a stock return.

**WEEE: Waste Electrical & Electronic Equipment.**

This directive is being implemented at different times and in different ways in each European country.

All products sold by OK International are classed as "B2B" (Business to Business).

All products within the scope have been marked with the  symbol since August 13<sup>th</sup>, 2005

For distributors in countries without OK International offices, they will be classed as the "producer" by the directive and will have the legal obligation to manage the disposal of the equipment.

There is a Certificate of Compliance available in English, French, German and Italian.

Please contact me if you have any questions.
