

OK International continues winning streak; celebrates SMT China Vision Award

Having recently collected its third consecutive Service Excellence Award, the team at OK International now has yet another reason to celebrate. The production specialist's MRS-1000 Modular Rework System was recently selected as the recipient of an SMT China Vision Award, having topped the program's hotly contested Rework & Repair category.

OK International's SMT China Vision Award was accepted by the company's Paul Wood at an awards luncheon held in Shanghai on April 20th. This prestigious award program was set up to recognize international and domestic SMT equipment, materials and service providers which have made outstanding contributions to the rapid development of China's electronics manufacturing industry. Judged by an independent panel of electronics manufacturing technology experts and SMT China readers, OK International's MRS-1000 Modular Rework System was recognized as having made an important contribution in the field of rework and repair.

Commenting on the award win, OK International Marketing Manager Jerry Simmons explains: "Here at OK International, we're committed to delivering real production benefits in every technology we develop. Our customers know this as the TAP advantage – since we enable them to spend less time on training, make advanced rework applications simple and boost productivity into the future. The MRS-1000 is no exception; dramatically increasing the productivity of rework areas by reducing technicians' workloads through innovative features such as automatic preheater

control, easy profile creation, integrated vacuum pickup, quick setup mode, digital controlled airflow – and much more!”

The recently introduced MRS-1000 Modular Rework System is a powerful high accuracy bench top solution ideal for processes requiring precise control such as the removal of delicate miniature SMT components. Highly versatile and integrating advanced rework technologies, the MRS-1000 comprises a handheld convection tool with a wide array of nozzles, pre-heater, adjustable tool holder with board holder, and light magnifier. Capable of handling PCBs up to 12” x 12” or above using the stand-alone BH-1000 Board Holder, the manually-assisted rework system is equipped to process components up to 40mm x 40mm, making it a flexible solution processes requiring increased control. Jerry adds: “We’re delighted the award judges and SMT China readers recognized the MRS-1000’s ability to deliver measurable advantages; we’re proud to be creating Superproducers throughout China and beyond!”

About OK International

OK International is a leading global supplier of soldering tools and equipment for electronics assembly. The product range includes bench top soldering and desoldering tools, array package rework equipment, fluid dispensing systems and accessories, and fume extraction systems. OK International is committed to understanding the product needs of its customers and supplies professional grade products that are innovative, reliable, price competitive and easy to use. Through a global sales channel, OK International provides expert product support and responsive customer service, with localization to meet regional market needs.
