

## *Restyled OK International website offers rich supply of new resources*

Global electronic assembly products and industrial supplier OK International ([www.okinternational.com](http://www.okinternational.com)) has announced the launch of their restyled website that highlights an array of new resources and services.

Visitors previously familiar to the site will immediately recognize a new homepage with 5 new navigation icons providing quick access to the site's most important and informative zones. These include a new [Solar Zone](#) dedicated to photovoltaic module manufacturing technologies. The recently released PS-900-Solar employs SmartHeat<sup>®</sup> technology proven to minimize thermal stress and prevent micro-cracking during tabbing and bussing operations.

Customers can now register one-time in the new Customer Zone and have access to an extensive array of technical documentation including data-sheets, application notes, research papers and process studies. They can then return anytime, login, and access new information.

Visitors can still find part numbers, specifications, manuals and updates for the entire product range that includes bench top soldering and desoldering tools, array package rework equipment, fluid dispensing systems and accessories, and fume extraction systems.

Direct links to the OK International Web Stores in both North America and Europe can be readily accessed, as can the video zone which offers informative and educational process and product videos. [www.okinternational.com](http://www.okinternational.com)
